I am a web developer specialized in large-scale international projects. My expertise includes the development of robust and scalable web applications, as well as the integration with different technologies.

I am highly skilled in working in multidisciplinary teams and agile environments, which allows me to deliver high-quality solutions within the established deadlines.

As a professional, I am always seeking to learn and update myself to stay at the forefront of new technologies and market trends. With my vast experience in web development, I am able to create efficient and customized solutions to meet the specific needs of my clients. My goal is always to exceed expectations and ensure total customer satisfaction.

## Skills

---

- Javascript | Typescript | Node | React | Redux | Vue | Next.js | Express | React | Python | PHP | Laravel | SQL | MongoDB | React Native
- Aws | Azure | Cloud Computing | CI/CD | Jest | Cypress | Unit Testing | OOP | E2E

## Experience

---

### Front-End Web Developer

**CI&T**

**02/2022 - Current**

At CI&T, as a Web Developer, I specialized in developing feat gaps and migrating systems to new countries. I played a key role in analyzing client requirements, designing effective solutions, and implementing enhancements to existing systems. Additionally, **I contributed to successful system migrations**, ensuring compliance with local regulations and delivering optimal user experiences.

### Frontend Web Developer

**aiqfome**

*Maringá, Paraná, BR*

**02/2020 - 02/2022**

At Aiqfome, as a Web Developer, I was responsible for refactoring, creating internal dashboards, and integrating systems. **I contributed to optimizing the performance and usability of existing systems**, developing intuitive and user-friendly interfaces. I also integrated third-party systems to enhance operational efficiency.

### Full Stack Developer

**Superpao**

*Guarapuava, Paraná, BR*

**08/2018 - 02/2020**

During my work at Grupo Superpão, a supermarket chain, I played a crucial role in various development areas:

- **Internal Resumes System:** Collaborated in optimizing resume receiving and management by implementing database and workflow improvements. Contributed to creating an efficient system that streamlined recruitment and selection processes.
- **Web Portal for Payslip Visualization:** Developed a customized web portal for internal payslip visualization, enabling convenient and secure access for employees. Improved transparency, facilitated financial control.

I also worked on creating reports that were of great importance in decision-making.

### Full Stack Developer

**Rp Sistemas**

*Curitiba, Paraná, BR*

**08/2017 - 07/2018**

At RP Info Sistemas, a company in the supermarket industry, I acted as a key member in the development of a mobile product, from its conception to implementation, using native **Android** and **Java Play** technologies. I contributed to the **creation of an innovative product** that enhanced the user experience and optimized operations in the retail sector.

## Education

---

### Bootcamp

**Rocketseat**

*Guarapuava, PR, BR*

**07/2019 - 12/2019**

- Immersive training in the latest web and mobile development technologies.
- Skills: React Native · Express.js · HTML5 · Jest · JavaScript · React.js · Node.js · CSS

### Bachelor of Technology

**Uniquairacá Centro Universitário**

*Guarapuava, PR, BR*

**02/2015 - 07/2017**

- Technology in Systems Analysis and Development

## Others

---

- **Silver Award:** I got second place in the hackathon in Guarapuava for creating a healthcare system. **(06/2017)**
